Search Engine Optimization or SEO is the primary tool to make the websites noticeable in the Google search page results although in order to ensure that the business websites rank better, there are several points that we need to take care and one such factor is link building.

It is the process of impregnating the business websites with as many links as possible that are associated with the similar products and/or services. Technically, these are also known as back-links and there ought to be sufficient numbers of such links in a particular website so that the ranking of the same gets better in the Google search page results. JDM Web Technologies has got some great [link building services](#) that will not only select proper back-links along with refined keywords but also ensure that there is optimum quality of content in the links that help to enrich the overall business website as a whole. This is ensured by:

- Keywords selection should be made in an appropriate manner so that the same are associated with the products/services being spoken of.
- The source of the links must also be a valuable and informative one.
- At the same time, the sources of the links are chosen as part of our **link building packages** in such a way that these are of very high PR quality.
- There are various types of personalized packages that we offer for the purpose of link building depending on the size of the company or organization along with the market necessities. All these include the incorporation of the articles, directory submissions, blog comments, social bookmarks, content dissemination and many more.

- The **link building packages India** are offered at competitive rates and these also depend on the number of links, for example, around fifty back-links pointing to the clients'™ websites is considered to be as high level whereas 5000 back-links pointing to other websites are considered to be as low level and the prices will vary accordingly.
