# Umoja Fest Partners with Hack The CD to grow businesses

Posted by [Staff](#) / 18 - Aug - 2016

Umoja Fest partners with Hack The CD and City of Seattle to grow and highlight African American culture and businesses in the Central District.

Umoja Fest will be connecting its vendors with training and resources to grow customer base and increase revenue.

The Hack The CD Cultural Innovation Conference provides opportunities to learn marketing and branding secrets from the pros, tips for new technology tools, and automation of your workflow to free up your time. Come with a new startup business idea or an existing venture. Your business will not be the same!

Vendor booths provide critical exposure and customer discovery and product validation opportunities for micro-enterprises. Startups will use Umoja Fest as a launch of the business or a new campaign or product using newly acquired skills to maximize their presence and participation in the festival.

Registration is now open for the 2015 Hack the CD Cultural Innovation Conference!
